The 2020 Health & Benefit Fair has been cancelled this year.

On May 25, 2020, the original charter of the Bricklayers and Allied Craftworkers Local 1 was signed in St. Paul, MN. The charter has changed several times during the years and now serves the states of Minnesota, North Dakota and South Dakota. Happy birthday to us!

[Washington, D.C.] December 18, 2019 – James Boland, President of the International Union of Bricklayers and Allied Craftworkers (BAC), has announced his plan to retire effective December 31, 2019, following more than 24 years of service as an International Union officer, including nearly a decade as President.

The International Union’s Constitution provides that in the event of a vacancy in the office of President, the Secretary-Treasurer shall fulfill the remainder of the term. Therefore, Secretary-Treasurer Timothy J. Driscoll will become the International Union’s President effective January 1, 2020.

A native of Ireland, Boland immigrated to the United States in 1970 to find work and a better life for himself and his family. After joining BAC in 1977, Boland worked in the San Francisco Bay Area in brick, block, stone, and marble before becoming a Business Agent in 1988. In 1992, he became President of Local 3 California, an office he held for two years until being called to serve the International Union as Assistant to the President for Trade.

International Union Announcements

Welcome TR Masonry, Inc., in Elk River, MN

It is with great pleasure that we introduce to you our newest contractor.

Owner Randy Becker (left) is welcomed by President Doug Schroeder

BAC 1 turns 135-years-old this year!

Continued on page 2
Jurisdiction and Regional Director for California and Nevada. In 1995, Boland was elected to his first term as a member of the IU Executive Board; he became Secretary-Treasurer in 1999, and President in 2010.

“Jim took the helm of our Union in its bleakest hour since the Great Depression,” remarked incoming President and current Secretary-Treasurer Tim Driscoll. “Jim’s passion for working people and his own capacity for hard work stabilized the organization and built it into the strong and vibrant Union that it is today. And his own experience as an immigrant drove him to ensure that ours will be an inclusive and diverse Union for the future, welcoming of all comers.”

Driscoll, a second-generation bricklayer, joined BAC Local 3 Massachusetts in 1985, where he served his apprenticeship and worked as a journeyman bricklayer on numerous commercial and institutional projects throughout the Boston area. Traveling for work in the early 1990’s, he eventually settled in the Washington, D.C. metro area and joined Local 1 Maryland/Virginia/D.C. in 1992.

Driscoll’s service with the International Union began in 1995 when he joined the IU’s Government Relations department, later becoming Assistant to the President. In 1999, he was promoted to Director of Trade Jurisdiction, vigorously and successfully defending BAC members’ work opportunities in scores of matters over the course of the next decade. During that time, Driscoll also served on the AGC Basic Trades Committee, the National Maintenance Agreement Policy Committee, and administered various other National Agreements on BAC’s behalf, working with many of the Union’s largest signatory contractors. In 2010, Driscoll was first elected as Executive Vice President, the office he held until his appointment as Secretary-Treasurer in January of 2017.

As Secretary-Treasurer, Driscoll has overseen the International Union’s financial and administrative operations and has been instrumental in shaping the IU’s communication, publication, education, and government relations initiatives. Driscoll for years also has led the International Union’s efforts to address emerging new products and systems in our industry, enhancing work opportunities for signatory contractors and BAC members alike. Well known since his early work in Trade Jurisdiction, Driscoll is recognized throughout the building trades industry for his judgment and strength, reasoned approach to issues and ability to solve problems and get things done.

Boland said, “It has been a privilege and a pleasure to serve as the President of this great Union, and particularly to serve alongside my friend, Tim Driscoll. I have every confidence in Tim’s strong leadership, his excellent judgment and his commitment to our Union and each of its members. BAC is in great hands and has a bright future.”

Incoming President Driscoll is also pleased to announce that he will appoint Robert Arnold as Secretary-Treasurer to fulfill the remainder of his own term, effective January 1, 2020.

Arnold, the National Director of Apprenticeship and Training for the International Masonry Training and Education Foundation since 2012, is a member of BAC Local 21 Illinois. He joined BAC as a bricklayer in 1978. Arnold was promoted to his first foreman position at the age of 23 and went on to lead numerous complex jobs for BAC signatory contractors as a foreman, general foreman, superintendent, and project manager.

Arnold began his teaching career in 1998 as an International Masonry Institute Job Corps instructor at the Paul Simon Job Corps Center in Chicago, Illinois. He then became an instructor with Local 21, and in 2001, Director of the Illinois District Council Training Center (DCTC), one of the largest BAC training centers in the U.S. In 2011, in addition to his DCTC position, Arnold became the North Central Regional Training Director and served in that role until becoming National Director the following year.

Driscoll said of Arnold’s appointment: “I have worked closely with Bob for many years on projects vital to the future of this Union. Bob’s enthusiasm for education and training, his track record of welcoming innovation and promoting members from underrepresented backgrounds, and his overall dedication to BAC’s members make him uniquely qualified for this moment in our Union’s history.”
Membership

I have had several new members call me to discuss their experiences on the jobsite. A few of them have left because of how they have been treated by their contractors and fellow members. Some have stated that they are being used as a laborer and not spending any time on the wall learning their craft. Others have been met with a cold shoulder and impatience. The importance of not only sustaining but increasing our membership is vitally important. These current and future members rely on the current members to help them show the way and become more educated in our crafts.

Not all of us were born into the craft that we now excel in. I, for instance, had no family members in the trade. I was introduced to the trade through a 49’er. He got me my first job. I was fortunate enough to have at least a few journey members around me who took the time to teach me the things I was not learning in school and the things I would need to know to stay employed. A lot of times it was “eyes open, mouth shut” or “always keep busy”. Others taught me techniques that made me more efficient. The tricks of the trade are a daily learning experience. New products enter our field on a regular basis. We conduct training throughout the year to educate the membership on these new products and how to mentor the new members that are on the job sites.

When meeting a new member for the first time, take a breath and remember where you came from and that you once were where this new member is now. Teach them, train them, support them so that they may pass it on. Membership is more than you and me. It’s all of us.

Allocations

Allocation meetings have been commencing throughout the local. Please check your calendar for upcoming allocation meetings.

We will be entering into negotiations with North Dakota and South Dakota contractors in the coming months. If you are interested in being a part of negotiations in your area please send an email to info@bac1mn-nd.org and we will contact you with information on negotiations.

BAC Defined Benefit Pension Fund

The members voted at the Jan. 4, 2020, allocation meeting to increase the contributions to the Pension Fund by $0.25 per hour. This is a proactive decision on the part of the members to continue to maintain this fund. It is important to understand that all the funds will need to be maintained to ensure that we can continue to enjoy these benefits.

Due to the International Bricklayers and Allied Craftworkers convention being held Sept. 28, 2020, through Sept. 30, 2020, we will be moving our semi-annual meeting forward one week. The new date will be Saturday, Oct. 10, 2020, at 9 a.m. 312 Central Ave 2nd floor meeting rooms. Please check our website for further information. The Executive Committee will meet on Oct. 9, 2020, at 9 a.m.

IMI Announcements

Effective Feb. 1, 2020, the International Masonry Training and Education Foundation (IMTEF), welcomes Anthony DiPerna, president of the Bricklayers and Allied Craftworkers (BAC) Local 3 New York, as National Director of Apprenticeship and Training. IMTEF, together with Joint Apprenticeship and Training Committees (JATCs) across the U.S. and Canada, provides apprenticeship training and lifelong learning in the trowel trades to BAC members across North America.

BAC President Driscoll said, “We are excited to welcome Brother DiPerna to this critical leadership role for our industry. I have every confidence that Tony’s years of experience as a craftworker, supervisor, local union officer, and chair of his local JATC have uniquely positioned him to lead BAC’s training and education programs in the coming decade and beyond.”

For in-depth releases on BAC’s new executive leadership and IMTEF’s national director of apprenticeship and training, see Driscoll Becomes President of Bricklayer’s Union as Boland Announces Retirement, and International Masonry Training and Education Foundation Announces DiPerna as National Director of Apprenticeship and Training.
Training Center News
By Barry Blazevic, Manager of Operations

We are in the busiest period of our school year right now. We are very excited as to how it is progressing at this time. The students have been very enthusiastic about the classes starting at 1 p.m. The attentiveness and ability to accomplish projects and lessons have been well received.

At this time we have the first- and third-year PCC students in for their training. A very comprehensive fall protection two-day training session was held and presented by CPWR. Due to our large numbers of PCC students, we have added two instructors, Craig Lundberg and Tom Noye. They bring years of experience to our team and are a welcome addition to the staff. The second-year PCC students will start their training shortly.

The first-through third-year brick and the tile students are attending on Tuesday, Wednesday and Thursday afternoons so we have had a full house of training.

We are hosting for the second year the Maple Grove middle school exposure to construction trades day that is sponsored by the MCMCA. This is on March 4, 2020. We are expecting 75-120 students that day and will have hands-on stations for them to experience the true trowel trades. We are always looking for help to man these stations so if you are available or laid off please contact John Slama and he will put your experience to work for part of the day!

Upcoming journeyman training sessions will be held at the center for flashing on March 11th, grout certification on February 26th.

We are going to conduct two pre-job training programs this year. We have found that this six-week training is invaluable to someone starting in our trades to getting placed with a contractor in the field and to have the basic abilities needed to start as a first-year apprentice by fall. These sessions will be for brick starting March 9th for six weeks and the second session for brick and tile starting on June 8th. If you know anyone that shows an interest in the trade please have them visit the website at BACtraining.org to sign up for these sessions.

It has been a welcome change to have school counselors and administrators soliciting us for information and availability to our trades. We are trying to get to any school that shows a direct interest to the construction trades and have conducted hands-on demonstrations for multiple groups this fall and winter. The Construct Tomorrow event in St. Cloud recently held had more than 400 high school students attend and try the various trades represented. The future is now!
Am I in danger?

Falls are the leading cause of death in construction. Almost every workday, somewhere in the United States, a construction worker dies as a result of a fall.

To learn more visit:

- www.StopConstructionFalls.org
- OSHA’s eTool: Falls - Personal Fall Arrest Systems https://tinyurl.com/OSHA-eTool-Falls

To receive copies of this Hazard Alert and cards on other topics: call 301-578-8500 or visit www.cpwr.com.

When do I need a fall protection harness?

If you are working …

- more than 6 feet above the ground, and
- you are not protected by a system of guardrails or safety nets.

Know the ABC’s of Personal Fall Arrest Systems:*

- Anchor Point
- Body Harness
- Components (Lanyards, deceleration devices, D-rings, etc.)

You are not safe from a fall unless you tie off.

*Source: OSHA 29CFR 1926.502

To stop a fatal fall …

1 Wear a full-body harness

A proper fall protection harness has straps worn around the trunk and thighs. If you fall, it will distribute “stopping force” across your thighs, pelvis, chest and shoulders to prevent severe injury.

2 Inspect your harness

It must be worn properly and be in good condition

- Inspect your harness for worn or damaged straps, buckles, D-ring and lines.
- Follow the manufacturer’s instructions when you put on your harness.
- Make sure all straps are fastened and adjusted correctly.
- Don’t start work until you are satisfied with the condition and fit of your fall protection harness.

3 Make sure you are connected

Your lanyard should be attached to the D-ring on your fall arrest harness, then anchored securely to an anchor point. The anchorage must be capable of supporting at least 5,000 pounds per worker attached.* Ask your supervisor if your anchor point can sustain the load without failure. Guardrails are not anchor points.

*Source: Source: OSHA 3146-05R 2015

It’s not over when the fall stops!

It only takes a short time for the harness to restrict blood circulation, which can lead to unconsciousness or even death.

OSHA requires employers to have a plan to “provide for prompt rescue of employees in the event of a fall.”

If you think you are in danger:

Contact your supervisor.
Contact your union.
Call OSHA 1-800-321-OSHA

IMI Masonry Minute

From Mark Swanson, AIA IMI - Director of Industry Development and Technical Services - Minnesota area office

Key IMI Activity Highlights

Minnesota IMI Director Mark Swanson provides masonry education and consulting expertise to the design and construction community, promotes masonry and skilled union craftworkers. The main goal of his activity is to create more job opportunities for members of BAC Local 1 MN/ND/SD by influencing the design and construction community to use masonry solutions in their projects.

Summary totals of 2019 MN IMI Activity

Events /Programs/ Seminars ......................... 71
Continuing Education Learning Units (LUs) given ........ 74.5
Registered people for events ........................... 1,468

AIA MN Conference

Swanson and IMI/BAC Local 1 administrative assistant Meghan Bittner staffed the IMI booth on Masonry Street in the expo hall, in mid-November, during the AIA MN Conference. The MN architect conference is one of the largest in the nation. The conference provides the opportunity to network with architects and contractors working in the region.

Recent IMI Seminars

IMI provides continuing education to architectural and engineering firms as well as signatory contractors. I encourage each of you to use masonry aesthetically, structurally and efficiently in their projects. Recent design firm outreach includes seminars to The Cunningham Group, U+ B Architecture, Collage Architects and Wilkus Architects. The MN Structural Masonry Coalition was recently at SEH Engineers in St. Paul encouraging the use of structural masonry wall systems.

Masonry Wednesdays

IMI Masonry Wednesday Seminar Series expose the design community to new masonry knowledge and create opportunities for suppliers to donate materials to the training center for members to train on. Masonry Wednesdays are always the third Wednesday of the month at the BAC Training Center in New Hope, MN. In November, more than 70 architects, engineers, and contractors registered for Meagan Elfert’s seminar, “Flashing, What Could go Wrong?” Her seminar focused on understanding the performance characteristics, compatibility with other wall components, and life cycle costs of the different through-wall flashing materials. In December, Justin Armatage of Henry Systems delivered a seminar on overcoming waterproofing challenges by using a liquid-applied PUMA system. PUMA is a cold fluid-applied waterproofing system with quick-curing technology providing long-term stability and permanent UV exposure. It is resistance to impact, scratches, punctures and slip resistance. Members and signatory contractors are always welcome at Masonry Wednesdays. (See list of upcoming topics on page 9)

IMI Traveling Road Show

Swanson has put together a combined seminar series that he puts on at major cities within the Local 1 MN/ND/SD territory. Recently, Swanson was in Duluth, MN, presenting “Flashing and Moisture Control” and “Masonry Movement Joints” seminars to more than 30 attendees which included architects, engineers, suppliers, and BAC signatory contractors like Streeter Masonry and Louhi & Kivaela Masonry. In 2020 Swanson will conduct similar events in Rochester, MN, and in North Dakota, Fargo, Bismarck, and Grand Forks. Swanson will be visiting Sioux Falls and Rapid City, both in South Dakota.

Training Programs for You

Training, quality, and safety is what sets the BAC apart from our competition. To learn more about training programs available to BAC members, visit www.IMTEF.org and www.bactraining.org.

Mark Swanson can be reached at mswanson@imiweb.org, 612-332-2214 or on his cell at 612-840-8695.
To learn more about the International Masonry Institute, visit www.imiweb.org.
What’s on the Election Day ballot in 2020?

All voters will have these races on their general election ballot:

- U.S. President
- U.S. Senator
- U.S. Representative
- State Senator
- State Representative
- Judicial seats

Voters may also have one or more of these races on their ballot:

- County Officials
- City Officers
- School Board Members
- Township Officers
- Local ballot questions

Special Elections

Special elections are used to fill vacant offices or decide ballot questions. They can be scheduled at various times during the year and may be held in conjunction with a regularly scheduled election.

Duluth area: Holiday Inn, 6 p.m. Oct. 9
Iron Range: Valentini’s, 6 p.m. Oct. 10

Chapter 3 Golf Tournament
Grandview Golf Links: Duluth 8 a.m. Sept. 12
Legislature Must Pass Local Jobs and Projects Plan

On February 11, the Minnesota Legislature reconvened for the 2020 session and lawmakers have much work ahead of them. At the top of the Minnesota AFL-CIO’s legislative priorities is the Local Jobs and Projects Plan, sometimes called a bonding bill. Simply put, this bill will allow the state to borrow money in order to repair and upgrade our critical public infrastructure and fund new public construction projects in communities across the state. It’s an opportunity to create tens of thousands of construction jobs while meeting Minnesotans’ infrastructure needs.

Minnesota’s public infrastructure is in need of a lot of work right now. Local communities and public institutions have identified more than $5 billion in needed construction projects throughout the state. Governor Tim Walz and Lt. Governor Peggy Flanagan listened to Minnesotans and in January, announced their priorities for the Local Jobs and Projects Plan. It was a historic announcement; with more than $2 billion in proposed infrastructure projects and more local projects than any previous Governor’s bonding proposal in state history. If passed, the proposal will fund roads, bridges, water treatment, and public building upgrades in our communities. It really proves that Governor Walz and Lt. Governor Flanagan mean it when they talk about building One Minnesota.

Passing the Local Jobs and Projects Plan will take bi-partisan support in both chambers, as bonding bill’s need a super majority of votes to get to the Governor’s desk. Please call your legislators (House at 651-296-2146 and Senate at 651-296-0504) and tell them specifically to pass a bonding bill that has at least $2 billion in investment.

While the Jobs and Local Projects Plan is our top session priority, there is much more lawmakers can do for working people this year. In 2019, we joined together to pass the nation’s strongest wage theft protections. The new law makes it a felony for employers to withhold wages workers are owed. The next step in fighting wage theft will be to crack down on Employer Fraud, the practice of employers treating workers who should be considered employees as independent contractors. Employer Fraud denies workers benefits, eligibility for workers compensation, and the right to organize. This practice is all too common in gig economy jobs, package delivery, non-union construction, and others. Employer fraud not only hurts workers but also puts high road employers at a competitive disadvantage. We’re in the early stages of working with lawmakers on legislation and it will likely take a new Legislature next year to get it passed, but legislation will be unveiled in the coming weeks.

The Minnesota AFL-CIO will also be supporting other key priorities this year such as Paid Family & Medical Leave, Tax Fairness, Affordable Healthcare, and the Freedom to Drive. However, given the current leadership of the Minnesota Senate, these issues aren’t likely to move forward this year. Elections have consequences and we can move forward on these and other pro-worker priorities if we retain the working families’ majority in the House and flip a handful of Senate seats. If you’re interested in being part of that effort, look for information on how you can get involved in our Labor 2020 campaign in a future column and on our website. I hope you can join us this year.
